Nothing Compares
NORTH CAROLINA

CJLEADS

Status & Enhancements

CJLEADS Status

- Over 29,000 CJLEADS users in North Carolina
- Over 550 federal, state, and local law enforcement organizations with operational presence in North Carolina are licensed to use CJLEADS.
- Total Offenders: 16.5 M
- Total Records: 54.8 M

CJLEADS Release 15

- CJLEADS is currently working on numerous enhancements that are expected to be released in March 2016.
  - Pre-Trial Release Orders Web Service
    - Real-time web service to NCAWARE to return pre-trial release order conditions for any non-disposed cases
  - Structured Sentencing Report
    - Aids ADAs with compiling offender data need for AOC Form 600 – Structured Sentencing Worksheet
  - Adding Alert for CHP and PPP
    - Proactively alerts Sheriff's Office personnel when disqualifying offenses are filed for CHP and PPP
  - Add From – To Address to Advanced Search
    - Allows to search for offenders by specifying a contiguous address range
  - Enhance Advanced Vehicle Report – Add Owner Type Filter to Search Criteria
    - Facilitates capability to search for vehicles by business name

CJLEADS Future Functionality

- Conversion to HTML5 / SAS 9.4 Upgrade
  - HTML5 is a modernized method of presenting information via the Internet
  - Working to determine timeline – most likely after midyear 2016
  - We will communicate in advance so users know browsers that will work with HTML5
  - HTML5 will eventually replace the Flash environment (which requires a browser download) but not right away – will run in parallel for a while to allow plenty of preparation time.
  - Once fully in production, the new version may have a different look and feel but will have all functionality that we currently enjoy
- Other efforts per recent legislation
  - Federal Data
    - MCA with DPS has been executed, setting the stage for CJLEADS to establish a web service to access Federal Data; preliminary planning in progress
  - Work towards integrating with LInXs
    - Workshop last month included LEOs; discussed the need to create a web service that could allow bi-directional access based on user roles
    - Next steps: meeting to discuss technical feasibility prior to seeking board approval

Work with DPS to implement a new intelligence-based case management system

Overview of New Enhancements Since November 2014
